Code Enforcement Board:

(no meeting in May)

Planning, Zoning & Appeals Board:

May 19th 7:00pm

From the Desk of the Fire Chief:

Wildfire Preparedness

Reduce the amount of materials that can burn near your home or business and the surrounding area by clearing away debris and other flammable materials, and by using fire-resistant landscaping and construction materials. Here are some actions that will help you reduce the impacts of wildfire:

- Rake and remove pine needles and dry leaves within a minimum of five feet of a building's foundation. As time permits, continue up to a 30-foot distance around the structure. Dispose of collected debris in appropriate trash receptacles.
- Get out your measuring tape and see how close wood piles are located to buildings. If closer than 30 feet, they need to be relocated. Move wood piles at least 30 feet away from structures.
- Sweep porches and decks, clearing them of leaves and pine needles. Rake under decks, porches, sheds and plant structures and dispose of debris.
- Mow grass to a height of four inches or less.
- On mature trees, use hand pruners and loppers to remove low-hanging tree branches up to a height of four feet from the ground (specific height depends on the type and size of tree).
- Collect downed tree limbs and broken branches and take them to a disposal site.
- Remove items stored under decks and porches. Relocate them to a storage shed, garage, or basement.
- Join forces with neighbors and pool your resources to pay for a chipper service to remove large debris from trees.
- Screen-in areas below patios and decks with wire mesh no larger than 1/8-inch to help keep embers out during a fire.
- Update your gardens and other outdoor plants to align with Firewise landscaping recommendations for your area. Find a list of recommended plants at www.firewise.org.

City meetings are now held at 201 West Moody Boulevard on the corner of South Forsyth in the new Commission meeting facility.
