

City of Bunnell

Monthly Newsletter

September 2015

MARK YOUR CALENDARS:

September 7: City Offices will be closed in observation of Labor Day.

REMINDERS:

HURRICANE PREPAREDNESS

Brochures available in the City Hall Lobby, Police Department and Fire Department.

Solid Waste:

September: No interruptions
09/07 Labor Day

October: No interruptions

November: No interruptions
11/11 Veteran's Day
11/26-11/27 Thanksgiving

Utility Billing:

The City of Bunnell Municipal Complex is open 7:30am-4:30pm Monday-Friday.

For your safety please do not submit cash payments for your water bill when leaving it in the drop box.

United Way Campaign:

The annual City of Bunnell Employee United Way Campaign will run from October 1st through October 21st. Check back next month to see how you can participate in

the fun and help employees raise funds for United Way of Volusia-Flagler Counties.

Building Department:

Office hours for the City of Bunnell's Building Official, Dennis Fischer, are Wednesday from 9:30am to 12:00pm. Building inspections are completed on Wednesday unless other arrangements are made directly through the Building Official.

DEPARTMENT NEWS:

Community Development:

All Business Tax Receipts (BTRs) expire September 30, 2015. BTR renewal season began in July. In accordance with an Interlocal Agreement, the City of Bunnell currently partners with the Flagler County Tax Collectors Office for all Local Business Tax Receipt renewals. Each business with a valid BTR should have received a renewal notice either by e-mail or a postcard from the Flagler County Tax Collectors Office in July. You can renew online at flaglertax.com or go to the Tax Collector offices to pay in person. You will renew your Bunnell and Flagler County BTRs at the same time. If you have additional questions, please call the Community Development office at 437-7516.

MEETINGS CALENDAR

City Commission:

September 14th, 28th 7:00pm

E-Pay and E-Billing

**You Wanted it, We're Getting it
done for you.**

One of the most common complaints Utility Departments receive has to do with the inability to make utility payments online. Well that is about to change. The City of Bunnell is very excited to announce the roll out of Online Bill Pay. Beginning October 1, 2015 Bunnell Utility customers will be able to sign into the City's website, create a profile, and manage their utility

account. Customers do not even have to contact the Utility/Finance Department to create a profile and enroll in the system. All you, the customer, needs to link a profile to a utility account is 1. Insert the utility account number and 2. Insert the last amount billed. Once the profile is created follow the prompts and you will be able to make a payment, look at the transaction history, view charts of consumption, and save your individual credit card number for future payments.

We will also be implementing E-Billing. Once customers have their Bill Pay profile, you will be able to elect to receive your utility billing via email instead of through the Postal Service. This will make it fast and convenient for everyone.

For more information, visit our website at www.bunnellcity.us/.

**The Beginning of the Final Stages
of the New Ion Exchange Water
Treatment Plant**

Some final additions are happening now at the new City of Bunnell Ion Exchange Water Treatment Plant. A SCADA System is being installed which is the Supervisory Control And Data Acquisition, a computer-based control system which will automate some of the control process such that plant operators can focus on other tasks

and will significantly reduce operating costs while improving system performance and reliability.

bility.

There are two resins in our new system which were loaded. The first resin is a dissolved organic carbon (doc) removal resin. Docs are a disinfection-by-product precursor so by removing them it greatly reduces the chance for DBP'S, which will keep us under EPA guidelines.

The first shipment of Industrial Solar Salt necessary for the operation of the water treatment process was also received from Morton Salt, Inc. The salt is used to recharge or regenerate the two resins. The salt will replace the doc and hardness ions on the resin.

The second resin was loaded as well. The second resin is a softening resin that will make the water softer and more aesthetically pleasing for our customers.

Many other enhancements are happening outside the new water treatment plant too. The new River Rock was installed for aesthetic appeal.

We are looking forward to the completion date and this new facility for the Bunnell community.
