

Public Notice
Aerial Spraying

In compliance with regulations of the Federal Aviation Administration (FAA), public notice is hereby given that the East Flagler Mosquito Control District may apply control products by helicopter over or adjacent to congested areas of Flagler County and its municipalities. The purpose of these flights is for the suppression of mosquito populations. Flights will normally be performed at an altitude of 500 feet. Additionally, the District may perform low level flights over and adjacent to wetlands for the purpose of arresting mosquito development.

Areas outside the boundaries of the District may also be subject to aerial spraying in the event of an extraordinary nuisance or potential public health threat.

All flights will be in the public interest, and at times, maximize public safety and mosquito control effectiveness. All control products are approved for control purposes by the Florida Department of Agriculture and U.S. Environment Protection.

For additional information visit the District website at flaglermosquito.com or by calling 386-445-4135. The website will map areas to be sprayed by truck or by air. Those desiring advance information on spraying may wish to visit the website frequently, or may telephone to be added to the District's advance notification list.
